Subject: Re: Soitec water question

Hi Jim

Interesting...the new Boulevard Border Patrol station is 31-32 acres, not 42.1, according to this posting by the station architects

(<https://www.facebook.com/media/set/?set=a.10150289498030994.333654.349185875993&type=3nd>)
and County comments on the Draft EA for the project construction, dated 11-13-09.

Wonder where the extra 10-11.1 acres came from?

Thanks for looking that up for me.

Donna

Hi Donna,

The actual location of the 42.1-acre site was the U.S. Border Patrol facility north of I-8 on Ribbonwood Road. The applicant indicated that the 24,204 gallons/acre figure is based on the contractor's experience at the U.S. Border Patrol facility during the construction.

If you have any other questions, please let me know.

Thanks,

Subject: Soitec water question

Hi Jim,

The 2 one-age AECOM construction water demand estimation sheets for Rugged Solar and Tierra Del Sol Solar say they are based on a 42.1 acre site located near Boulevard, CA.

Please as AECOM to identify and provide the following:

1. the actual location of the 42.1 acre site
2. what the site was/is used for
3. when the referenced work was conducted
4. the construction water consumption report or other document(s) that AECOM's 24,204 GAL/ACRE figure is based on

Thanks!

Donna
